**SUBJECT:** Custom PWA Digital Showroom & Lead Management CRM

### **1. Project Overview**

Development of a premium Progressive Web App (PWA) digital showroom for Adguru Car Melo, featuring a 360-degree interactive vehicle viewer and a custom-built backend CRM system for lead tracking and salesman management.

### **2. Scope of Work & Deliverables**

- Progressive Web App (PWA) Showroom: A high-performance, mobile-first website that functions exactly like a native app. Customers can "Add to Home Screen" directly from their browser without downloading from the Play Store. Includes dynamic WhatsApp inquiry buttons for every vehicle.
- Interactive 360° Car Viewer: Custom image-sequence integration allowing users to click and drag to view the exterior of the vehicles in 3D space. (Note: Dealership is responsible for providing the 36 continuous exterior photos per vehicle).
- Custom CRM & Admin Panel: A secure backend system with Role-Based Access (Admin & Salesman).
- Advanced Lead Management: Database architecture to track customer inquiries, assign leads to specific salesmen, and utilize heavy filtering (search by name, phone, budget, and lead status).
- Domain Setup: Registration and configuration of a premium .com or .in domain name (e.g., sadgurucarmelo.com).

### **3. Project Timeline**

- Estimated completion time: 2 to 3 Weeks from the date the advance payment is received and the domain is registered.
